

biogenesis

Registration is

OPEN!

Biogenesis is an International Biomedicine Olympiad for high school students. Registration is 100% free!

3 in 1 Olympiad

Biogenesis allows participants to compete for multiple awards! Since there are 3 areas in which participants can register, a candidate has 3x more chances to be awarded if he chooses to register in all of them. When completing your registration, make sure to mark which areas you want to compete in.

Areas

**Anatomy &
Physiology**

**Cellular & Molecular
Biology**

**Pharmacology &
Toxicology**

Structure of the competition

Categories

◆ Standard

- High School and Gap Year students

◆ Open

- Anyone who does not meet the Standard Category eligibility criteria

Areas

Anatomy & Physiology

Cellular & Molecular Biology

Pharmacology & Toxicology

Each area has its own exam. Participants must indicate, at the time of registration, in which areas they wish to compete. Each area offers its own awards.

Register here

<https://forms.gle/1qNuqU5PK8gN4Uyz7>

The exam

It will be entirely online and will consist of two phases. All questions will be multiple choice. In the first phase, the questions will have only 1 correct answer. In the second phase, the questions will have 2 correct answers.

The first phase will be available between the 8th and 14th of October. Students may take the exam at any time, as long as it is within the established dates. Participants will have 1 hour and 30 minutes per area to finish the exam. If a student has chosen to participate in more than one area, it is not necessary to complete all of them on the same day.

The rules of the first phase apply to the second. However, students will only be able to answer the exams of the areas in which they obtained a score equal to or greater than the cut-off point. The second phase will be available between the 5th and 11th of November.

All students will receive certificates of participation. Participants with outstanding scores will receive gold, silver, bronze, or honorable mention certificates. For more information about the olympiad, check our regulations available on the website <https://biogenesisolympiad.com>.
